DETAILED ACTION

Claim Rejections - 35 USC 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 13-15, 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Noone et al.

Noone et al disclose a cover (41) made of insulating material (col. 5, lines 15-20) and inherently dissipating heat generated by a transformer because of its transparent property of the cover, the transformer mounted on a printed circuit board (2) (col. 4, lines 11, 12) being exposed to a translucent part of the cover (re claims 1, 2, 13).

Re claim 3, wherein, a bobbin, a core and transformer winding are inherent in the transformer.

Re claim 4, see Fig 5.

Re claims 5, 6, 14, 15, 20 outer shell comprising first and second halves (32, 41), filling material (38).

Re claim 7, outward extending protrusion (45).

Re claim 8, pins (5).

Re claims 9, 10, the transformer forms a part of power supply circuitry (col. 6, lines 40-46), first and second output of the transformer is accessible through the power pins (4, 5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noone et al.

Noone et al disclose a translucent or transparent cover (41) made of insulating material (col. 5, lines 15-20) and inherently dissipating heat generated by a transformer because of its transparent property of the cover.

Re claims 18, 19 outer shell comprising first and second halves (32, 41), filling material (38).

The teaching as discussed above does not disclose the cover having a shape substantially the same as the transformer (re claims 16, 17).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the shape of the cover of Noone et al by employing a specific shape, since more than a mere change of form is necessary for patentability. In re Span-Deck Inc. v. Fab-Con, Inc. (CA 8, 1982) 215 USPQ 835.

Response to Arguments

Applicant's arguments filed 11-05-2004 have been fully considered but they are not persuasive.

Applicant argues (1) that there is absolutely no disclosure or suggestion in the specification where the transformer is located, (2) that Noone does not suggest the transformer being exposed to the cover.

With respect to (1), (2), see col. 4, lines 11-12.

Allowable Subject Matter

Claims 11, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
